Both of them are experienced Sunday School teachers. In this revised edition, some supplementary material have been added by Peter C. T. Lim.

How to use the book

Using the Book as a Companion Book

This Student Workbook was designed as a companion book and therefore works best when used together with the multimedia book The Visual Bible Explorer Series – Moses and the Exodus’.

In a Bible class environment, the teacher can play the multimedia lesson by lesson and then break the class up according to their age groups. In their age group classes, the teacher can then use the workbook to re-emphasize a lesson that was taught in the multimedia.

Using the Book without the Multimedia

We understand that not all classes may have the benefit of the multimedia book. A Bible class can be conducted with the Student Workbook and a Bible. In such cases it would be especially important for someone to read aloud the given passage for the lesson. Quotations used in the workbook are taken from the New International Version ^(NIV).

Duration of each Lesson

We recommend that the teacher takes about 40 minutes, at least, to complete each lesson. However if the class cannot finish a lesson within their allotted time, they can continue or finish it in the following week. Ideally, it should be one lesson per week.

Journaling their responses

Ask the children to write their answers to the questions on the book itself. The book will then serve as a journal as they take this journey of discovery in their understanding of the Bible; but remind the children that the process requires learning as well as application.

May you all be richly blessed as you use The Visual Bible Explorer Series in learning and applying valuable lessons from the Bible.
